EXPERIENCE

Intern | Mastishk Info Tech Pvt. Ltd. | Nov 2025 – Present

NOV 2025 - 30 April 26

- Provided technical support for a transport management software used for:
- Package delivery management
- Worked with SQL databases for:Data management
- Query execution and resolving database-related issues
- Created and managed reports using Crystal Reports according to business requirements.
- Worked on TSPlus (TS+) environment for remote application access and system support.
- Assisted users in resolving software and system-related issues efficiently.
- Coordinated with teams to maintain smooth software operations and reporting processes.

PROJECTS

Web Scraper & Analytics Dashboard

[Github](#)

- * Developed a modular Python-based web scraping platform using Requests and BeautifulSoup for multi-page structured data extraction.
- * Implemented retry mechanisms, rotating user agents, request throttling, and logging for resilient scraping workflows.
- * Built analytics and visualization pipelines using Pandas and Matplotlib to generate insights from scraped datasets.
- * Designed an interactive Flask dashboard with dynamic search and filtering capabilities for real-time data exploration.

Ai-job-tracker

[Github](#)

- Developed a full-stack AI-powered job application tracker using Django and PostgreSQL with secure authentication, resume uploads, analytics dashboard, and NLP-based resume skill extraction. Implemented search/filter systems, dynamic Chart.js analytics, and production deployment using Render, Gunicorn, and WhiteNoise.
